

Creating a Super User

If you don't have a super user with your Paperless-NGX installation, you can create one with a command.

```
docker compose exec -it <PAPERLESS CONTAINER> createsuperuser
```

```
> Username (leave blank to use 'paperless'):
```

```
> Email address:
```

```
> Password:
```

```
> Password (again):
```

```
> Superuser created successfully.
```
