

Opera

[Opera Browser](#) is fully-featured for privacy, security, and everything you do online.

- [Adding a Customised Search Engine](#)

? Adding a Customised Search Engine

In this case, I'm gonna add the [docker](#) search engine in Opera for MacOS.

CHEATSHEET

1. Open **Opera**
2. Type `opera://settings/searchEngines` in the address bar
3. In the **Site search** menu, click on **Add**
4. Fill the fields like this:
 1. **Name:** Docker Hub
 2. **Shortcut:** `docker`
 3. **URL with %s in place of query:** `https://hub.docker.com/search?q=%s`
 4. Don't check the **Use POST** checkbox
 5. **DONE**

DETAILS

Open Opera and Go to the Settings

1. **Open Opera.**
2. In the **address bar**, type <opera://settings/searchEngines> and press **Enter**:

[Opera_settings.png](#)

3. Scroll to "**Site search**" section and click on "**Add**":

[Opera_search.png](#)

4. Fill in the fields like this:
 - **Name:** Whenever you want to call it, here: *Docker Hub*
 - **Shortcut:** *docker* or anything short you'd like
 - **URL with %s in place of query:** `https://hub.docker.com/search?q=%s`

[Opera_fields.png](#)

5. Click **Add**.

Opera_add.png

? How to Use It:

Now, in your address bar, just type: `docker <THE_NAME_OF_A_DOCKER_IMAGE>`

...and you'll be taken to the Docker Hub search results for `<THE_NAME_OF_A_DOCKER_IMAGE>`.
